

Ideal Sweeper

Novelty!
Ideal 650

Type *Ideal* 650 for Wheeled Loaders and Fork-Lifts

The *Ideal* sweeper applies to the industry and building-industry, in particular. It cleans all surfaces around your building, parkings and building-sites. By its dust seclusion, the *Ideal* is an excellent machine, too, for the cleaning of halls. The uncomplicated attachment system for fork-lifts or wheeled loaders enables the operator to set the sweeper going very quickly. Its robust design and the integrated hopper incl. hydraulic tip guarantee a long life of the machine. The heart of the *Ideal* 650 is the pendulating main brush. The particular V-bristles have especially been developed in order to absorb fast aground dirt, but also fine dust. Hence, an excellent sweeping-result is always guaranteed. The hydraulic motor, which is placed inside the main brush is protected against damage. Three support-wheels ensure an optimum guide downwards.

Attachment systems:

- Fork-tine system, incl. 3D-level compensation
- Combined fork-lift/- wheeled loader attachment system (SWE), incl. 3-D level compensation

Options:

- Water spray equipment, incl. 100 / 200 l tank and intermitting-pump
- Hydraulic side brush
- Extra strong wheels Ø 250x80 mm for rough jobs
- Road Lights for public roads

Technical data	<i>Ideal</i>	150	180	210	240
Working width	cm	150	180	210	240
Brush ø	mm	650	650	650	650
