

Simplex Sweeper

Type Simplex for Municipal Tractors and Front Mowers

The PTO-sweeper *Simplex* was developed especially for your small municipal tractor and front-mower. Its low weight permits the *Simplex* to be used for carrier-vehicles with a low lifting-power. The 100% PP full bristle brush (\varnothing 400 mm) guarantees a long service life. You can use the *Simplex* for both summer and winter service. The broom is adjusted via the support-wheels. Standard equipment includes level compensation, swivel control console and mechanical angling. Basic equipment: incl. A-frame and PTO-shaft.

Attachment systems:

- A-frame
- Three-point linkage
- Attachment system for front-mowers (direct mounting)

Options:

- Dirt collector incl. mechanical emptying and vulkollan lip
- Hydraulic emptying of the dirt collector (double-acting hydraulic control circuit required)
- Hydraulic drive of the main brush
- Hydraulic angling (additional double-acting hydraulic control circuit required)
- Hydraulic side brush, adjustable for low-wall sweeping
- Snow brush
- Splash guard for winter service
